# Jordan McCollam

Full Stack Developer

## ABOUT ME

Hello world! I'm 23 years old and married to the beautiful Leesha McCollam. I've gained experience working for Neurotargeting, developing information-heavy interfaces for medical use.

Before coding, I learned problem solving skills as an audio engineer. I later enrolled in Vanderbilt's full stack coding bootcamp and haven't looked back since!

## CONTACT

**Location:** Decatur, GA, 30030
**Email:** jordy.mccollam@gmail.com
**Phone:** 707-301-3687
**Portfolio:** https://jordanmccollam.github.io/

## PROJECTS

*(all code is available on Github)*

### Instaplan
https://insta-plan.herokuapp.com/

Project management tool. Create, edit, and share projects. Assign todos and track their progress.

**Built Using:** React, MongoDB, Mongoose, Sass, Express.js, Auth0, Node.js, Javascript

### Smart Diary
https://smart-diary.herokuapp.com/

An online diary with the added functionality to track your moods. Users can create, edit, and view entries, as well as graphs displaying mood patterns.

**Built Using:** React, MongoDB, Mongoose, Sass, Express.js, Auth0, Node.js, Javascript

### Bills N' Sheet
https://billsnsheet.herokuapp.com/

Finance tracker. Add bills and their due dates and see how many bills remain for the month as well as how much spending money is left.

**Built Using:** React, MongoDB, Mongoose, Sass, Express.js, Auth0, Node.js, Javascript

### Laser Defender
https://jordanmccollam.github.io/laserdefender/

Game inspired by Galaga created using the Unity Game Engine. It has its own spin on the classic game with features like dodging and collecting shield.

**Built Using:** Unity, C
