Jordan McCollam

Full Stack Developer

ABOUT ME

Jordan is an inspired software developer. He was certified by Vanderbilt's Full-stack Coding Bootcamp and gained professional experience working for Neurotargeting.

His pride and joy is developing video games in his free time. Jordan loves problem solving and thinking creatively; and coding is his outlet!

PROJECTS

(all code is available on Github)

Bills N' Sheet (Website)
https://billsnsheet.up.railway.app/

A simple but useful website to track your finances without linking any bank accounts. The idea is to know how much money is free to spend after all of your bills have been taken care of. This app also showcases Jordan's design skills and familiarity with React.

Built Using: REACT, MONGODB, MONGOOSE, SASS, NODE.JS, AUTH0, EXPRESS.JS

EmoBall (Video Game)
https://www.youtube.com/watch?v=ttlYU7xV-eA

A multiplayer game where you embody emotions and battle for control of the human psyche! Each emotion/character has a unique ability to aid you in battle. The game is developed, designed, animated and scored by Jordan. EmoBall is to-be-release VIA Steam. Jordan would love to demo the game with you. For now, check out this youtube video all about the game and its development.

Built Using: C#, UNITY GAME ENGINE, LOGIC PRO X, AFFINITY DESIGNER

EDUCATION

Vanderbilt Full Stack Coding Bootcamp	*VanderbiltUniversity, Nashville, TN*	*07/2019 - 01/2020*
Complete ASP.NET.MVC Course	*udemy.com*	*08/2019 - 01/2020*
